

Preproject = 1990 conditions; Postproject = year 0 after construction; Postmitigation = year 40 after construction

Note: "Upper Project" represents the Upper Guadalupe River Project

Figure 6.2-4 Simulated Temperatures for August of the Dry/Median Year for the Guadalupe River Project with Proposed Action

The potential Guadalupe Creek mitigation site is represented by model segments 5-6; Segments 1, 2, and 3 of the Guadalupe River Project include model segments 30-37; and Reach A consists of model segments 38-39.
